Last Updated: December 7, 2020

(Subject to Change)

North Country Timing & Scoring is the Official Timing Organization for the Pikes Peak International Hill Climb. Competitors are required to have a transponder on their vehicle during all PPIHC Events below:

### **Testing Weekend (June 11, 12, 13 only)**

Competitors on the Lower Section of the course must check out and return a transponder from the Timing & Scoring Tent located on Pit Row during their session each day. Be sure to return your transponder at the end each day.

### **Race Week (Practice/Qualifying)**

Competitors will receive a transponder bracket only at Technical Inspection. All competitors will then need to pick up a transponder on Pikes Peak at the Lower Section or Middle Section depending upon which location they will be practicing or qualifying. Competitors must install the transponder on their vehicle prior to Practice/Qualifying.

Competitors on the Lower or Middle Sections of the course will get times from North Country Timing & Scoring (transponder based). All times in the Upper Section will be calculated by our hand-timing team (non-transponder based). Competitors may keep the transponder, or return it, based upon which section they will be practicing or qualifying on next.

All transponders must be turned in at the conclusion of Friday's practice (or Thursday's, if not attending the optional practice session on Friday) to be recharged for Race Day.

### **Race Day**

Competitors must pick up a transponder the morning of Race Day at the Timing & Scoring Tent on Pit Row and install it on the vehicle prior to lining up. At the conclusion of the event, all transponders will be collected at the summit. If they are missed, they must be returned to the Timing & Scoring Tent on Pit Row or the Timing & Scoring Mobile Mini by the Start Line.

**Lost or Damaged Transponders**

If a transponder is lost, damaged, or not returned, competitors will be required to pay for the transponder within 30 days of notification by the PPIHC/North Country Timing & Scoring. The cost to replace a transponder is \$300.00 USD.
