(Subject to Change)

### Radio Interference/Frequency Use

In recent years, the PPIHC has encountered issues with internet and other communication devices due to frequency interference.

The following radio frequencies are restricted for PPIHC Official Use only throughout the 2020 Race and Practice Days:

- 2412 MHz – 2484 MHz
- 5100 MHz – 5900 MHz
- 24.0 GHz – 24.2 GHz
- 151.400 MHz – 151.900 MHz VHF
- 153.01 MHz – 153.25 MHz
- 157.500 MHz – 160.500 MHz VHF
- 450 MHz – 451 MHz
- 594 MHz – 595 MHz
- 3.6 GHz – 3.7 GHz

The PPIHC may add additional restricted frequencies which are for internal PPIHC use only. Competitors and teams will be informed if any restricted frequencies are added.

Use of mobile hot spots by competitors, race teams and/or spectators on Pikes Peak is prohibited during Race Week or Practice Days.

Competitors planning to use specific frequencies for team communication are required to e-mail Daniel Rodriguez ([daniel@ppihc.org](mailto:daniel@ppihc.org)) by July 15, 2020 with the frequency being used and an overall communication plan.
