

024 - 2020 Important Checkered Flag Reminders

Posted Online: May 28, 2020

Last Updated: May 28, 2020

(Subject to Change)

This information is for ALL checkered flag situations:
Testing, Practice, Qualifying, and Race Day

Space on the Summit is extremely limited due to the construction. Additionally, the area at the Summit immediately following the checkered flag is significantly narrower than in past years. The road also has many deep potholes filled with water from the runoff immediately past the checkered flag point. The highway will be working to repair the damage each night, but you need to be aware this will be a hazard.

In addition to these specific concerns at the Summit, competitors **MUST** slow down after receiving the checkered flag in all sections. Failure to do so could result in a PPIHC fine and/or penalty.

This has been implemented for your safety. We appreciate your attention and cooperation.
